
LETTERS FROM NEWS READERS

To The Editor—

We have gone through some strenuous times in the past few days and in some instances we have been misrepresented, nine out of ten persons I have talked to are on our side and for five days I was in Oklahoma and not one person condemned us for the stand we took. Our Governor deserves a vote of thanks for the way he co-operated with us, for he could have taken the spineless attitude of Governor Clements of Tennessee or Governor Chandler of Kentucky and called out our state militia, but instead of that he called our School Superintendent and the School Board and instructed them to advise the Court to see him as they were acting on his advice. From now on there is no reason for our Superintendent or the board to worry about the stand to be taken. We now know the courts at this time are acting under the influence of a communistic plot and furthermore we know the Federal Government has never given authority to govern the operation of the Public Schools by the States and until they are given that authority their acts are null and void. They are usurping a power that rests exclusively in the Congress of the United States and if Congress would do its duty they would impeach the entire Court.

May I congratulate you one and all on the courage you have displayed and on the good judgement you have used.

WEBB B. JOINER,
